EXPERIENCE

USAA - Senior Data & Analytics Engineer - Contract, San Antonio, Texas Dec 2024 - Present

- Built and deployed executive-facing Workforce and Financial dashboards across Headcount Management, Risk, Forecasting, and Project Support - providing C-suite visibility into business performance across the organization
- Developed an enterprise-wide data capture and visualization solution using Tableau to track product performance across numerous business verticals; adopted by over 400 product managers and enabling consistent, centralized product reporting
- Implemented Workforce Performance and Strategy self-serve reporting tools for enterprise leadership to track productivity and realization by integrating a host of views into a few key interfaces, saving leaders 300+ hours monthly
- Modernized legacy data workflows by implementing scalable pipelines in dbt, PySpark, Snowflake, and Great Expectations, automating the collection and transformation of strategic data and reducing processing time by ~40%
- Delivered an interactive Space Intelligence Platform mapping 30K+ workspaces across 400+ offices, integrating spatial, workforce, and facilities data to provide real-time insights on occupancy, ownership, and cost
- Developed and deployed custom business applications using MS Power Platform/Power BI to streamline data collection, transformation, and reporting workflows, significantly reducing manual effort and accelerating reporting cycles

Dick's Sporting Goods - Capstone Data Scientist, Austin, Texas Feb 2025 - May 2025

- Built a scalable data pipeline to ingest, process and transform over 10M rows of strategic data across 900+ stores for the Loss Prevention team, enabling further downstream analytics and modeling
- Developed multiple predictive models (XGBoost, GLM, Gradient Boosting, Random Forest) to forecast shrink by combining internal operational data with external Census datasets and identifying key drivers of profit eroding activities
- Deployed the top-performing model ($R^2 = 0.91$) in production, improving predictive accuracy by ~8% and enabling the Loss Prevention team to generate real-time insights and data-driven shrink reduction strategies
- Presented model results and feature-importance insights at the RILA and LPRC industry conferences, demonstrating enterprise ML techniques to an audience of loss-prevention professionals nationwide

PricewaterhouseCoopers (PwC US) - Technical Consultant - II, Bangalore, India Feb 2020 - May 2023

- Designed and implemented Salesforce data solutions across Service, Sales, Health and Data Clouds, focusing on member management, data integration, analytics and customer lifecycle tracking for large Healthcare and Energy clients
- Supervised the integration of Salesforce with legacy ERP systems using custom Lightning Web Components and REST/SOAP/GraphQL APIs, improving data synchronization and reducing discrepancies by 30%
- Developed reusable Alteryx workflows to clean, transform, and migrate data, publishing standardized solutions to PwC's Digital Lab, becoming one of the most downloaded solutions with 200+ downloads across the firm
- Implemented Omnichannel routing and AI-driven automation (Einstein Bots, Genesys/Avaya CTI) to streamline case handling, increasing agent throughput by ~25% and automating ~15% of routine cases across support teams
- Received four PwC performance awards; mentored 100+ colleagues toward Salesforce Health Cloud accreditation; won the firm-wide Architectural Review Board White Paper Contest for "Dynamic Integration"

TECHNICAL SKILLS

- Languages:** Python (Pandas, NumPy, Scikit-Learn, TensorFlow, PySpark), R, SQL, Java, JavaScript, Apex,
- ML / AI:** XGBoost, Random Forest, GLM, Gradient Boosting, NLP, KNN, Model Deployment, Feature Engineering
- Data Engineering:** dbt, Snowflake, Databricks, Azure, MS SQL Server, MySQL, PostgreSQL, PySpark, Great Expectations
- BI & Visualization:** Tableau, Power BI, Power Query, DAX, MS Excel, RStudio, Alteryx Designer
- Platforms:** Salesforce (Service/Sales/Health/Data Cloud), MS Power Platform, Genesys, Avaya CTI
- Certifications:** Snowflake SnowPro Core, 7xSalesforce Certified, 2x PwC Badge Holder, UIUC Business Analytics Specialization

EDUCATION

The University of Texas at Austin May 2025

Master of Science, Business Analytics

- Key Courses: Data Engineering, Information Management, Machine Learning, Data Governance and Analytics

Manipal Institute of Technology, India

Aug 2020

Bachelor of Technology, Computer Science and Engineering

- Key Courses: Data Structures and Algorithms, Database Management, Business Intelligence, Digital Marketing

SELECTED PROJECTS

Influencer Marketing Analysis | Social Media Analytics, Python, KNN, Random Forest Feb 2024 - Apr 2024

- Developed machine learning and network-analytics models to identify top Twitter influencers and generate tailored influencer scores, enabling personalized influencer-campaign matching based on configurable input parameters

e-Bike Recommendation System | Natural Language Processing, Python, Selenium Jul 2023 - Oct 2023

- Analyzed 13K+ e-scooter reviews using NLP to extract brand-feature associations and built a recommendation engine to identify the best options among 300+ models based on user input
